

Seminar: Mold prevention in garment, leather & footwear production

Factories and assembly plants, particularly in tropical regions, are ideal breeding grounds for mold due to high levels of warmth and humidity. Inappropriate storage and/or packaging may increase mold problems. The methods and controls used to manage mold growth must be carefully monitored to improve the situation.

Conducted by Bernard Manuel, an international expert from **Bureau Veritas**, SMART Myanmar is pleased to host this seminar designed to...

- **Raise awareness and understanding on potential causes of mold formation in product shipments.**
- **Educate on systems and practices that can prevent and mitigate the risk of mold in shipment.**

Where: UMFCCI ground floor, 29 Min Ye Kyaw Swar Street, Lanmadaw Tsp.

When: **October 30th, 2018 from 9.00am until 4.00pm**

Languages: English, with simultaneous interpretation in Myanmar language

Email khinoo@smartmyanmar.org or call 09-262600436 by Oct. 26th to register. Participation is free for managers and staff of MGMA member companies and 40,000 MMK/person for non-members.
